ELITEX CZ

CHRASTAVA

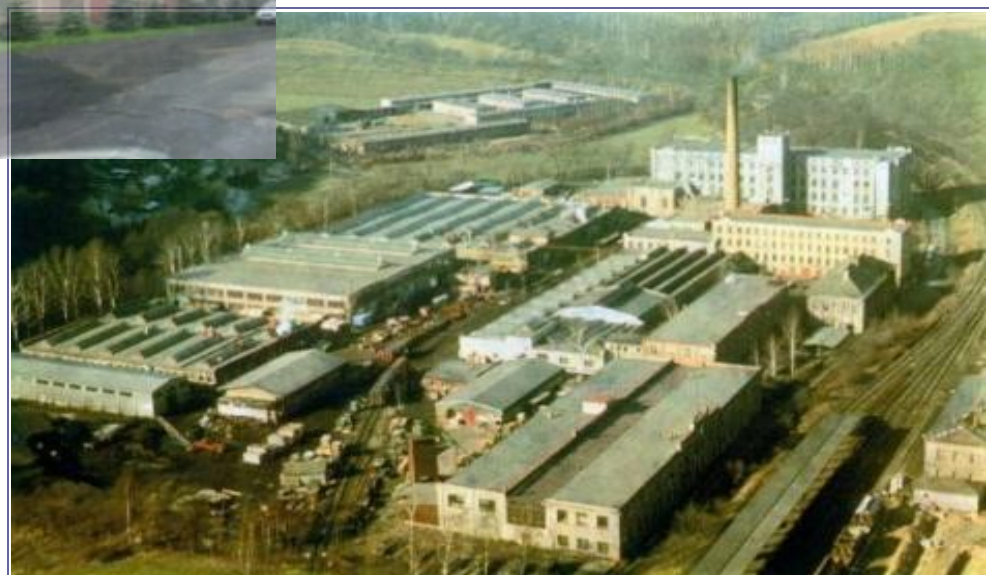

The history of the company dates from the end of 19th century. In 1882 established baron Klinger a textile factory. In the years of World War II. was the factory a part of the Spreewerke armament concern. The factory was nationalised in 1945. Its began to write the story of the Kovoprůmyslové závody – Textile machinery works.

The products – thrilling, drying, fixing and spinning machines - were distributed mostly to the former SU-market and the other European socialist countries. The machines were designed on the technical level of the world leading producers. Since the end of the 20th century the company Elitex production manufactured machinery.

Thereafter, the Elitex CZ, joint stock company, reconstructed the productions rooms step by step, modernised the technological equipments of the works significant. Therefore Elitex CZ was growing to a modern industrial firm, bringing potentialities offering services for other producers and business partners – if direct manufacturing or co-operations.

...with best Quality

Productions programme:

...Pressurizer in hydraulic systems

Pressurizer for pressure compensation in hydraulic systems of the car industry and building machines. Compensating primarily pressure of the car axles, brakes and control systems.

...Assembling cars and more products for car industry

Mounting cars incl. equipments for motor mounting. Tool boards and cases, jigs.

...Antenna masts

Metall masts for radio signal transmissions. Metall cutting, welding, assembling and surface finishing of the masts incl. fasteners.

...Textile industry equipment

Spooler skeletons, cylinders (rollers) and spare parts.

...Glass moulding devices

Plugs, cooling pipes etc.

...Other metall working

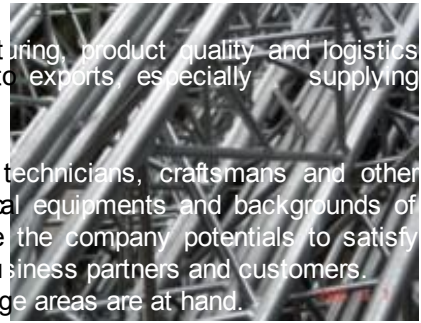

Sortiment of customer ordered small machinery products.

From Chrastava to European markets...

Flexible manufacturing, product quality and logistics are the best conditions to exports, especially supplying German P-Market.

100 engineers, technicians, craftsmans and other professionals, technological equipments and backgrounds of the ELITEX CZ guarantee the company potentials to satisfy the requirements of the business partners and customers. Cranes, proportional storage areas are at hand.

We are able ...

...Brand saw cutting (precision up to 1 m), shape burn cutting (corta) up to 300 mm, watter jet cutting (stainless up to 25 mm), shears up to 10 mm.

...Machining (precision 0,05 mm), workpiece up to 1 m, cylinder machining up to 3 m length, crane 2,5 t, grinding - gear wheels, screws, worms, worm wheels.

...CO₂ welding, spot welding, crane, workpieces 2 x 2 m.

...Sheet bending up to 2,5 m, Baltec shearing, curl up.

...Blackening, bath up to 2 m, vanishing, drying and burning kiln..

...Mechanical assembling, electrical engineering.

...Planing up to 6,5 m length.

...Hard facing (shaped surface).

...Constructions, design (PC drawings) .
